

PEUGEOT 106 1.0i (TU9M (CDY)) 1994 until 2000

## 42 coolant temperature sensor(Bosch Mono Motronic MA 3.0)

### Function

The coolant temperature sensor is a temperature-sensitive resistor. Low temperature causes high resistance while high temperature causes low resistance. The control unit determines the temperature by monitoring the voltage across the sensor.

### Specification

supply voltage: 5 V (connector disconnected)  
resistance: 2,000 - 3,000 ohms / 20 °C  
resistance: 200 - 300 ohms / 90 °C

### Diagnostics
